

WOOD-SKIN

CAFE' INTERIOR

FOLD
PANELS

The WOOD-SKIN® team sought inspiration for the new Fold Panels in the folds and textures of nature.

The panels' extraordinary plasticity translates natural geometries into mathematical expression, creating comfort and privacy to enhance any space, without ever neglecting the ideal relationship between form and function.

Thanks to the repetition and scalability of the modules, the geometries of the new Fold Panels allow you to create infinite configurations and apply them to multiple purposes.

CAFE' INTERIOR

Fold Panels are 3D panels with intriguing geometries, built inside a rectangular or square module.

Fold Panels are uniquely suited to transform a space with the colors and configurations that best fit the project's overall vision. They can also be sound-absorbing.

The result is a product that tells a story in the elegant, carefully measured language of fine design. The option of choosing among various precious materials allows the realization of site-specific installations that feature wooden textures, iridescent metal surfaces, or volumes with uniform solid colors.

All the materials used in WOOD-SKIN® systems are FSC® certified and come from a guaranteed supply chain.

NAME: Cafè

DESIGN: Wood-skin

CATEGORY: Hospitality

MATERIAL: Ultra-thin reconstituted wood

**A PRODUCT THAT
TELLS A STORY
IN THE ELEGANT,
CAREFULLY
MEASURED
LANGUAGE
OF FINE DESIGN.**
